Principal SE	\$175
SE Project Manager	\$145
SE	\$115
EIT	\$100
Structural Designer	\$105
Structural CAD Drafter	\$85
Admin Support	\$50

As we welcome 2009, we are aware that this will be a year of change. We at GeoDatum are seeing the effects of the economy on our clients, peers, employees, consultants, friends and family. We recognize the need for all of us to work together to develop a more sustainable economy that is based on more realistic pay scales and project profitability rates that better reflect today's economy. At GeoDatum we are making the necessary adjustments to work within this new economic paradigm. The first result of that effort to our clients is a revised rate sheet and more flexible payment terms.

GeoDatum has made the internal adjustments necessary to allow us to once again offer the same billing rates we offered in 2006. These new rates are effective immediately and will result in savings of between 12% and 15% for most projects.

In addition, we are also making payment terms available that allow for a more even and predictable cash flow for the client over a longer period of time. A typical boundary and topographic survey can be paid for over 4 to 6 months using extended payment terms. We are happy to discuss payment terms for any prospective project regardless of the project size.

As always, we also accept all major credit cards for payment.
